

# BT33”S Assembly Instructions

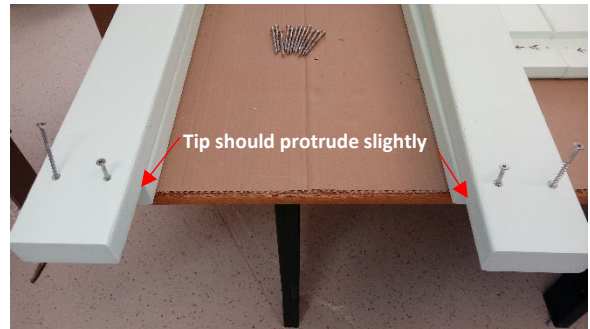

Thank you for your purchase of the Built To Last Bar Table 33”S

Simply follow the directions below and you will soon be ready to enjoy your new Bar Table. Please call us at 877.258.2578 if you have problems with your assembly. Your satisfaction is our main concern!

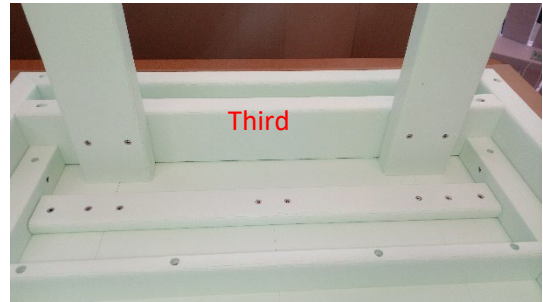

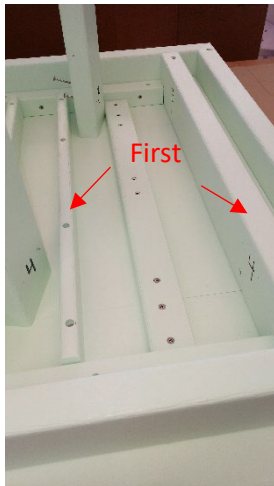

**Step 1.** Lay out all pieces as shown and insure you have: 1 package of screws, 2 leg assemblies, 2 wrap pieces labeled ‘A’ and ‘B’, and 1 table top.

**Step 2.** Insert 4 screws into the first leg assembly by hand. Using a drill and the provided bit run one screw on each leg all the way through till it slightly protrudes. **\*Note that screws go in at a slight angle. This is intentional to accommodate pieces on underside of table top.\***

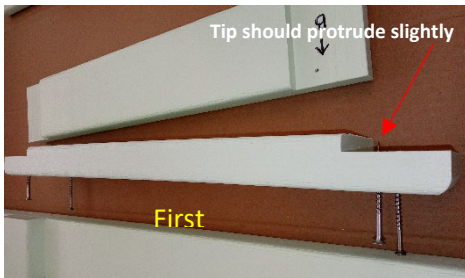

**Step 3.** First, note the numbers on the leg assembly and insure that you are preparing to attach them to the corresponding numbers on the bracing. Second, using the protruding screws as a guide, align the leg assembly with the pre-drilled holes in the bracing on table top. Tighten the alignment screws 1<sup>st</sup>, then, third tighten the other two screws. This insures proper leg placement. Repeat this step for the second leg assembly.

**Step 4.** You are now ready to attach the two wrap pieces labeled 'A' and 'B'. Hand insert four screws into wrap piece 'A'. Locate the arrow on the wrap piece and insure it is facing up. First using a drill and the provided bit, run the two 'top' screws in the wrap labeled 'A' till they slightly protrude.

Second using the two protruding screws as a guide, align wrap 'A' with leg 'A' so that the arrows are facing in the same direction. The screws will fit into the pre-existing holes on the leg to properly align the wrap with the table. Tighten top two screws first, then tighten the remaining 2 screws. Repeat step 4 for the remaining wrap labeled 'B'.

ENJOY YOUR BUILT TO LAST Bar Table!!!
